

"Have a closer look at this lil' ripper"

Here's why you see so many Foldaway Antennas up!

Rugged, flexible construction with a multi-directional element. The patented design moves to catch all types of signals, regardless of polarisation.

Straight-forward attachment at eye level, means no dangerous acrobatics when setting up! The marine grade top clip and bottom bracket are tough and durable in all types of weather. This antenna picks up digital signals extremely well.

Easy access to cable, the pole effortlessly locks into place on the solid mounting bracket.

Time to move on? Everything folds down to just 90mm x 500mm and fits into its own storage container.

Do you need a Foldaway Tall Boy Antenna ?

If you have an A van, Wind Up or Soft Sided Van, you will need the extra height so you can install it on your van, extra lead (so the kids can watch TV in the annex) and extra-sized storage tube that comes with this Foldaway option! Be sure to let us know your needs before you order.

"Bullet Proof" Signal Amplifiers ready to plug into your Foldaway Antenna are available.

Tips for better TV Pictures using your Foldaway Antenna

1. Always start with the elements pointing at 2 and 10 o'clock, then if necessary, adjust for better reception. Point elements at 12 and 6 for vertical polarised signals or 9 and 3 for horizontal signals.
2. **When you move,** you must re-tune your TV to the local stations. e.g. Ch9 in Brisbane is on a different frequency to the Ch9 affiliate on the Sunshine Coast. Re-tune your TV each time you move. After tuning your digital TV or set top box, you may be able to fine tune your reception by using the signal strength or quality meter built into your set. Poor signal **quality** usually relates to polarity, adjust the arms to suit the horizontal or vertical polarity. Consult your user manual to find your signal strength or quality meter. Phone apps such as "My Switch" can tell you signal location and polarisation (vertical and horizontal).
3. **Check the outside antenna plug.** Often dirt, moisture and corrosion will affect the picture quality. **Check it by plugging the Foldaway directly into the TV set.** We made our direct connector so this is easy to do.
4. **Trees and bushes will absorb incoming signals.** A direct connector will allow you to bypass these signal destroying connections. The Foldaway unique patented, multi-polarisation head enables you to position it off the van, in any position under the tree, inverted, even horizontally on the ground, to source the best signal path.
5. **When you are in an area with very low signal,** an amplifier from Foldaway will help. Ask about this excellent accessory which simply plugs right in.
6. **There are places** where TV does not exist! These are commonly referred to as . . . "Read a Book Instead" Zones!

"Get better TV pics wherever you go with a Foldaway"

Proven around Australia and New Zealand
Compact - Lightweight - Durable - Good Value - Maintenance Free
Designed - Built and Owned by Australians

"We designed the portable Foldaway to bring in very good signals, even from FM radio. This antenna can be used for horizontal and vertical signals, using our patented design.

For value, ease of use and reliability, no other caravan antenna can be compared to it! We've packed in real performance at an affordable price, for people on the move."

-  Easily tuned for both horizontal and vertically polarised signals.
-  Simple to assemble and install.
-  "Eye level fit" means you can attach it quickly within arms length.
-  Optional Tall Boy for wind ups and A vans.
-  Unbeatable performance for the price.
-  Proven all around Australia and New Zealand!

Plug your antenna directly into the TV

Direct Connector puts an end to:

Corroded/salty/dusty/wet/worn out/loose and poor outside connections. Banishes signal-sapping cable joins and resultant signal loss. Only one connection instead of five!

SAVE
at least 10db
and get yourself
off the digital
cliff!

Simple to use

Nothing's more reliable than a Foldaway!
